STER-BOX Product Introduction

Why your car needs an air purifier?

dizziness, fatigue, Nausea, tonsillitis, tracheitis, chronic pneumonia and other respiratory diseases

various irritating/carcinogenic gases; pollen allergy; formaldehyde exceed the standard etc...

air pollution second-hand smoke automobile exhaust automotive interior

UVC—Physical Sterilization Way (more safely)

Deep UV sterilization is a physical sterilization way, which destroy the reproduction and viability of bacteria from the root without producing any toxic.

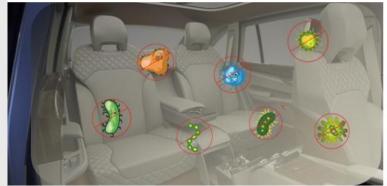

The interior of the car is not as clean as you think

Poor air circulation and small space inside the car which may make the car a mobile toxic gas chamber.

We can't change the pollution, but we can give you and your family a good air quality inside of the car.

Before Use

STER-BOX can easily help you solve the problems of air pollution in your car.

It has more comprehensive **deep UV disinfection**, killing almost all bacteria.

It is equipped with **anion fresh air function**, making health will always accompanied.

Contrast of Functions

Traditional car purifier		STER-BOX					
Major medium	Anion	Deep ultraviolet UVC + Antiviral Nancomposites +Anion					
Functio n	Clean air	Air sterilization, virus suppression, freshen air					
Work Principl e	Pure anion intelligent could freshen air but may produce ozone pollution.	 Deep ultraviolet UVC: Using the characteristics of UVC to pierce the base pairs of DNA (RNA) of bacteria or virus, destroy the protein structure, achieve rapid sterilization and virus suppression; this method is physical sterilization, which will not produce toxic side effects. No secondary pollution of ozone, and has environmental protection characteristics Anion freshen, no ozone pollution 					
Appear	Large volume, occupying space.	light and small; with anti-skid pad at the bottom; can be placed conveniently					
Noise	Loud noise.	Silent designing<30dB					

Working mode MUC intelligent regulation

Rated voltage DC5V Input Voltage 5V / 1A Rated power 3.6W Air volume Large

Working noise Mute design < 30dB Power supply interface Micro-USB

Work indicator Supports four-color display (red /

Purple / Blue / green)

Custom mode high / low / cycle Energy efficiency High efficiency

Sterilization rate 99.99%

Formaldehyde removal rate 99.99%

Fan type High efficiency turbofan with PWM

speed regulation function

Applicable space Smaller than 15m Product size 145 * 89 * 42mm

Product net weight 270g

Applicable environment car interior / bedroom / study room/ living room

Academic conclusion

Using the characteristics of UVC to penetrate the base pairs of DNA (RNA) of bacteria or virus, destroy the ability of accounting replication and protein structure, so as to achieve rapid sterilization and virus suppression.

According to the conclusion of cooperation between ASTM e1052-11 and medical center, the solution: UVC + antiviral nanocomposite has 99.99% bactericidal effect on Enterovirus (Yinke 11), influenza virus, respiratory fusion virus, pulmonary tuberculosis in 24 hours.

High efficiency anion purification [internal anion generator, release of high concentration anion group intelligently, adding vitamins to the air]

Let you breathe like in the forest while driving!

Have a STER-BOX

Health will always accompanied.

Sterilization, virus suppression, formaldehyde removal, odor removal
——The best partner for driving!

谢谢! Thank you!
